PROFILE

Senior data engineer with 8+ years building data platforms and pipelines — Databricks-deep (Spark, Delta Lake, Unity Catalog, Asset Bundles), dbt-fluent and metadata-driven by conviction. I integrate the hard sources — ERPs, legacy systems, APIs — and leave behind tested, automated pipelines and teams that can run them.

CORE EXPERTISE

- **Databricks engineering** — Spark, Delta Lake, Unity Catalog, Workflows, Asset Bundles, agentic AI
- **Pipelines & modeling** — dbt, dlt, metadata-driven ETL, dimensional modeling, Great Expectations
- **Source integration** — SAP, 4PS, Autodesk, M-Files, AS400/DB2, REST APIs
- **CI/CD for data** — GitHub Actions, Azure DevOps, Databricks Asset Bundles, tested deployments
